-  **Getting Started**

Before diving into Teams integration, you'll need an active Uncovai account with a valid subscription.

- **Account Setup Process**

**Step 1:** Create your account at [Uncovai.com](https://uncovai.com)

**Step 2:** Choose your subscription plan at [Uncovai Pricing](#)

**Step 3:** You're ready to protect your meetings! 

 **Pro Tip:** All Uncovai solutions become available once your account is set up

---

-  **Microsoft Teams Integration Setup**
- **Installation & Configuration**

### 1. Install from Microsoft AppSource

Navigate to [Microsoft AppSource](https://appsource.microsoft.com) and search for "Uncovai Deepfake Detector" or access it directly through the Teams app store

### 2. Launch Your Meeting

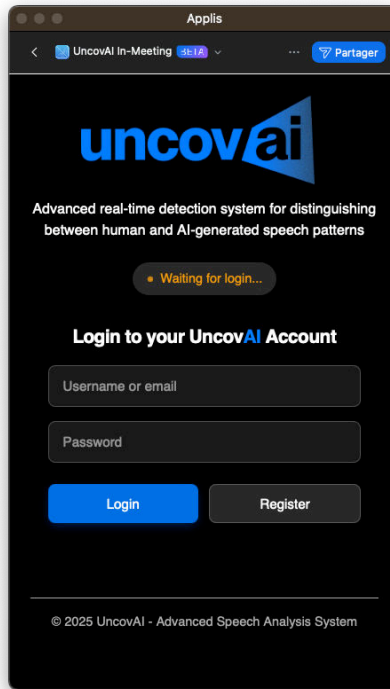

Create or join any Microsoft Teams meeting where you want deepfake protection

### 3. Activate Uncovai

Click the **Apps** button (three dots menu) in your Teams meeting toolbar and select **Uncovai Deepfake Detector**

### 4. Secure Authentication

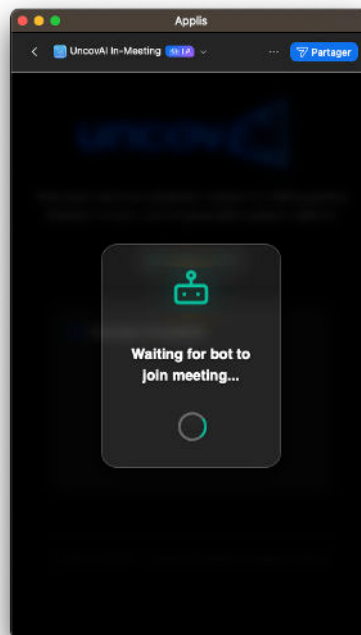

First-time users will see our login screen. Enter your Uncovai credentials or create a new account on the spot.

## 5. Bot Deployment

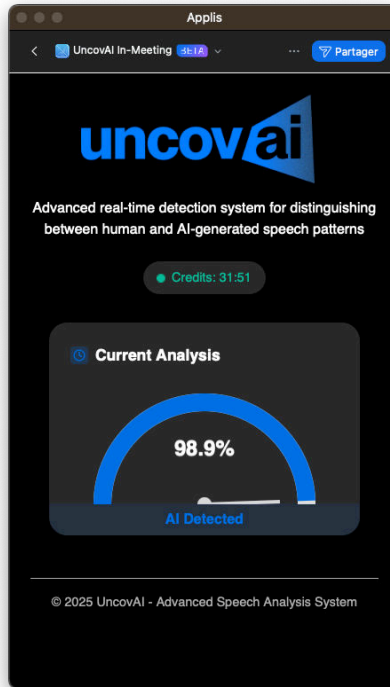

Our AI detection bot will automatically join your Teams meeting for real-time monitoring.

**⚠ Important:** If your meeting has lobby restrictions enabled, you'll need to manually admit the Uncovai bot from the lobby

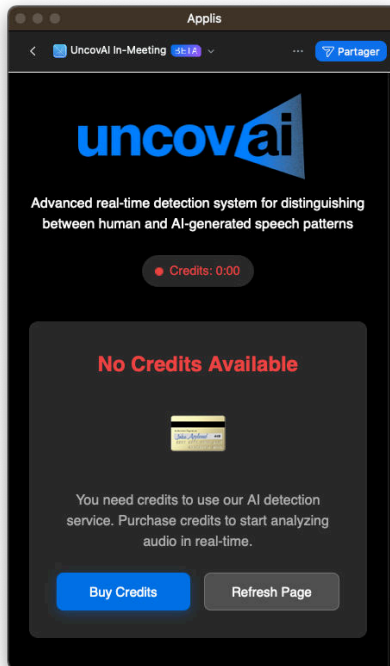

## 6. Live Protection Dashboard

Once active, monitor your meeting's security through our real-time metrics dashboard. Track detection alerts and credit usage seamlessly within the Teams interface.

🔥 **Realtime detection performs optimally with continuous speech. Interrupted or segmented speech may decrease model accuracy.**

📊 **Credit Monitoring:** Keep an eye on your remaining credits to ensure uninterrupted protection

## 🗑️ Uninstalling the App

Need to remove Uncovai from your Microsoft Teams? Follow these simple steps:

1. **Access Teams Admin Center** - Go to [admin.teams.microsoft.com](https://admin.teams.microsoft.com) (admin rights required)
2. **Navigate to App Management** - Select **Teams apps** → **Manage apps** from the left sidebar
3. **Find Uncovai** - Search for "Uncovai" in the app list
4. **Block or Remove** - Click on the app and select **Block** to prevent usage, or use **Remove** if available

**For Individual Users:**

1. Open Microsoft Teams
2. Go to **Apps** in the left sidebar
3. Find **Uncovai Deepfake Detector** in your installed apps
4. Right-click and select **Uninstall** or **Remove**

---

## **Stay Protected**

With Uncovai Deepfake Detector, every Teams meeting becomes a secure space free from AI-generated deception. Questions? Visit our [support center](#) or contact our team directly.
